01 · INTRODUCTION

Every product page tab, managed from Admin

Product Tabs adds custom tabs to Magento product pages and takes control of the built-in Details, More Information and Reviews tabs. Show each tab to the right products, customers and dates, change it on a single product, and start from ready-made tabs for FAQ, size charts, videos, product safety and related products.

**Unlimited tabs**

Page Builder or editor content, widgets, CMS blocks and product variables.

**Rules and schedules**

Conditions on any attribute or category, store views, customer groups and dates.

**Ready-made tabs**

FAQ with structured data, size chart, video, product safety (GPSR), related products.

**Built-in tabs under control**

Rename, reorder, hide or schedule Details, More Information and Reviews.

**Per-product overrides**

Show, hide, rename or replace a tab for one product and store view.

**Fast and cache-friendly**

Rendered with the page for search engines; heavy tabs can load when opened.

Magento 2.4.x

Open Source and Adobe Commerce

PHP 8.3 – 8.5

Tested on 2.4.9 with PHP 8.4

Luma & Hyvä

Theme-specific templates included

Magedia Core 1.2

Installed with the module

02 · INSTALLATION

Install in five steps

1 Get your access keys

Sign in at store.magedia.com and open **Account** → **Keys** for the repo.magedia.com username and password.

2 Add the Magedia repository

Register repo.magedia.com in Composer and save the keys in `auth.json`, never in source control.

3 Require the package

Composer installs Product Tabs with Magedia Core.

4 Enable and upgrade

Enable the modules, run the upgrade and compile.

5 Check cron

Magento cron refreshes cached pages when a scheduled tab starts or ends.

```
composer config repositories.magedia composer https://repo.magedia.com
composer require magedia/m2-product-tabs
```

```
bin/magento module:enable Magedia_Core Magedia_ProductTabs
bin/magento setup:upgrade
bin/magento setup:di:compile
bin/magento setup:static-content:deploy -f
bin/magento cache:flush
```

Installing from a ZIP? Unpack it to `app/code/Magedia/ProductTabs`, install Magedia Core the same way, then run the commands from `module:enable` on.

After installation the product page looks the same: the Details, More Information and Reviews tabs keep their titles and positions until you change them.

03 · GENERAL SETTINGS

Settings

Stores → Configuration → Magedia Extensions → Product Tabs

General

Enable Product Tabs Turns the module on for the store view. When off, product pages show the theme's own tabs.

Layout Tabs, Accordion or All sections expanded. Tabs become an accordion on phones.

FAQ and video tabs

FAQ Structured Data Adds FAQPage data so search engines can read your questions.

Video thumbnails Off by default. When on, preview images may load from YouTube before playback.

Product safety (GPSR) and AI Drafts

GPSR defaults Manufacturer, EU responsible person and warnings used when a product has none.

AI Drafts Anthropic, OpenAI or Gemini with your own API key, for "Write Draft" in custom content tabs.

Use the scope switcher at the top of the page to give a website or store view its own layout. Save Config, then refresh the page cache.

Where to manage tabs

Magedia → Product Tabs → Tabs lists every tab, including the three built-in ones. Use **Add Tab** for a blank tab or its arrow menu to start from a template.

04 · CREATING A TAB

Creating a tab

Magedia → Product Tabs → Tabs → Add Tab

ID	Title	Code	Type	Position	Store Views	Status	Show From	Show Until	Action
1	Details	description	Built-in tab (Details, More Information, Reviews)	10	All Store Views	Enabled			Select
2	More Information	additional	Built-in tab (Details, More Information, Reviews)	20	All Store Views	Enabled			Select
3	Reviews	reviews	Built-in tab (Details, More Information, Reviews)	30	All Store Views	Enabled			Select
4	Shipping & Returns	shipping	Custom content	40	All Store Views	Enabled			Select
5	Specifications	specs	Product attributes	22	All Store Views	Enabled			Select
6	Contact	contact	CMS block	90	All Store Views	Enabled			Select
7	You May Also Like	you-may-like	Related, up-sell or cross-sell products	70	All Store Views	Enabled			Select
8	Frequently Bought Together	bought-together	Related, up-sell or cross-sell products	75	All Store Views	Enabled			Select
9	Video	video	Videos	25	All Store Views	Enabled			Select
10	FAQ	faq	FAQ	50	All Store Views	Enabled			Select
11	Product Safety	product-safety	Product safety (GPSR)	60	All Store Views	Enabled			Select
12	Setup Guide	setup-guide	Custom content	80	All Store Views	Enabled			Select

The tabs grid with built-in, custom and scheduled tabs.

Question	Answer	Remove
Is the {{product.name}} waterproof?	It is water-resistant, not waterproof.	
What is the warranty?	Two years.	

[Add Question](#)

Add FAQ Structured Data ☒ Yes

Future releases will enable you to create and edit the questions. Also, make "FAQ Structured Data" on in the

A FAQ tab: questions and answers with optional structured data.

Enabled

Shows or hides the tab everywhere.

Title

Tab name on the storefront. Use `{{product.name}}` or any attribute code to include product values.

Code

Used in links to the tab, e.g. `#shipping`. Created from the title when left empty.

Type

What the tab shows: custom content, attributes, a CMS block, linked products, videos, FAQ, product safety or a built-in tab.

Position

Lower numbers come first. The built-in tabs use 10, 20 and 30.

Open When the Page Loads

The first tab marked this way opens when the page loads.

Store View Titles

A different title and content per store view, for translations.

05 · TAB TYPES

Eight types of tab

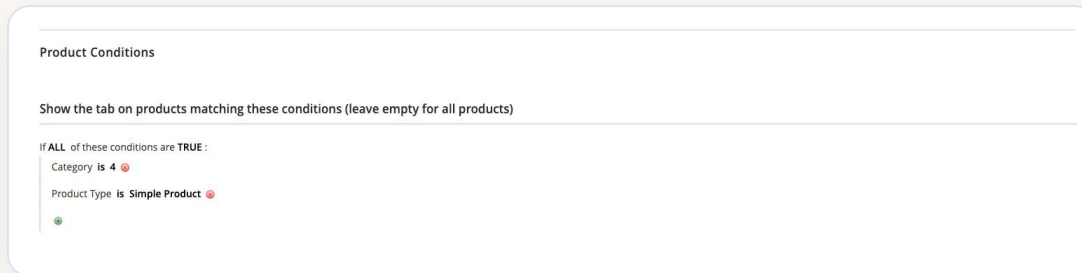

Choose a type when you create a tab, or start from a template such as Shipping & Returns, Size Chart, Warranty or Product Safety and edit the example text.

Type	What it shows	You enter
Custom content	Your text, tables, images and widgets	Page Builder or editor content
Product attributes	A table of chosen attributes; empty values are hidden	The attributes, in display order
CMS block	A CMS block, per store view	The block identifier
Linked products	Related, up-sell or cross-sell products as product cards	Link type and maximum number
Videos	YouTube and Vimeo players that load when pressed	One link per line
FAQ	Expandable questions and answers, with FAQPage data	Questions and answers
Product safety (GPSR)	Manufacturer, EU responsible person, warnings, documents	Product fields or store defaults
Built-in tab	Magento's Details, More Information or Reviews	Nothing: rename, reorder or hide it

06 · TARGETING

Show tabs to the right products

Tab form → Where It Shows · Product Conditions

The screenshot shows a configuration form titled "Product Conditions". Below the title is a subtitle: "Show the tab on products matching these conditions (leave empty for all products)". Underneath is a section labeled "If ALL of these conditions are TRUE:". It contains two conditions: "Category is 4" and "Product Type is Simple Product". Each condition has a red circle with a white dot next to it, indicating it is active. There is a green plus icon at the bottom left of the conditions list, suggesting an option to add more conditions.

Show a tab on simple products in the Bags category.

Leave Product Conditions empty to show the tab on every product.

Store Views

All store views or only the ones you choose.

Customer Groups

Empty for everyone. B2B shared catalogs are customer groups too.

Show From / Until

Dates in the store view's time zone; the end date is included.

Only Products Enabled in the Product Form

Ignore conditions and show the tab only where a product switches it on.

Only for Customers Who Bought the Product

For setup guides or downloads. Never stored in the page cache.

Load Content When Opened

For heavy tabs. Search engines may not index this content.

07 · PRODUCT OVERRIDES

Change tabs for one product

Catalog → Products → edit a product → Product Tabs

Change tabs for this product only. Empty Title, Content and Position keep the tab's own values; Content replaces whatever the tab shows. Settings apply to the store view chosen at the top of the page.

Tab	Show	Title	Content (HTML)	Position
Specifications ▼	Hide ▼			
Shipping & Returns ▼	By tab rules ▼	Bag Delivery		
<button>Add Tab Setting</button>				

Schedule Design Update

Hide Specifications and rename Shipping & Returns for this product only.

**Show**

Default (tab rules), Always Show (ignores conditions) or Hide.

**Store views**

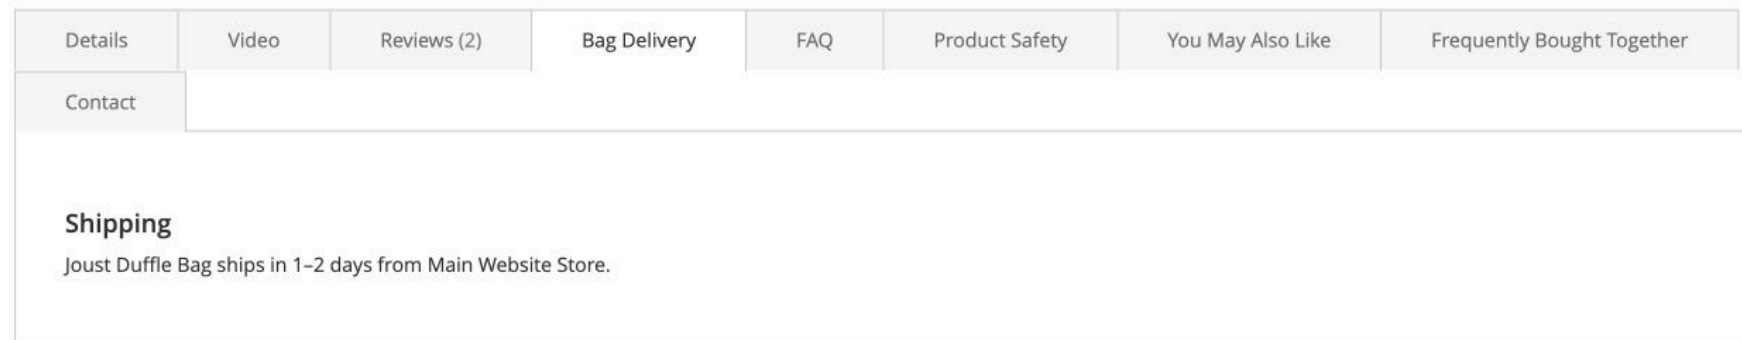

Switch the scope at the top of the product page to change one store view.

**Title, content and position**

Leave empty to keep the tab's own values. Content replaces whatever the tab shows.

08 · STOREFRONT

What customers see

Custom and built-in tabs on a Luma product page; "Bag Delivery" is a per-product title.

Layouts

Tabs, accordion or all sections expanded. On phones, tabs turn into an accordion. Links such as `product.html#shipping` open the tab directly.

Themes

Luma-based themes use Magento's tab markup. Hyvä themes get their own Alpine.js templates. Breeze uses the Luma markup.

09 · TROUBLESHOOTING

If something looks wrong

A tab is missing

Check that it is enabled, assigned to the store view and customer group, inside its dates and that the product matches its conditions. Empty tabs are hidden.

Changes appear late

Saving a tab cleans cached product pages. Scheduled tabs need Magento cron, which runs hourly for this module.

A theme shows tabs differently

Custom themes may rename the product details or related products blocks. Contact us with the theme name and we will help.

AI drafts fail

Check the API key and model under AI Drafts. Nothing is saved when a draft fails.

When you contact support, include your Magento, PHP and theme versions and a link to an affected product page.

Have a question? Contact us!

Send your Magento, PHP and theme versions with the steps that show the problem.
