01 · INTRODUCTION

Samples in their own cart

Sample Order lets customers collect samples in a separate cart and order them with dedicated payment and shipping methods. Whatever is in their regular cart stays exactly where it is.

Sample button
Shown beside the buy button on purchasable product pages.

Dedicated methods
Payment and shipping available only to sample carts, per sales channel.

Standard orders
Sample orders appear in the normal Admin order list.

Separate cart
Its own offcanvas cart and header indicator.

Guests and customers

Rule and Flow support
A Sample order cart condition and a Sample order created event.

02 · SETUP

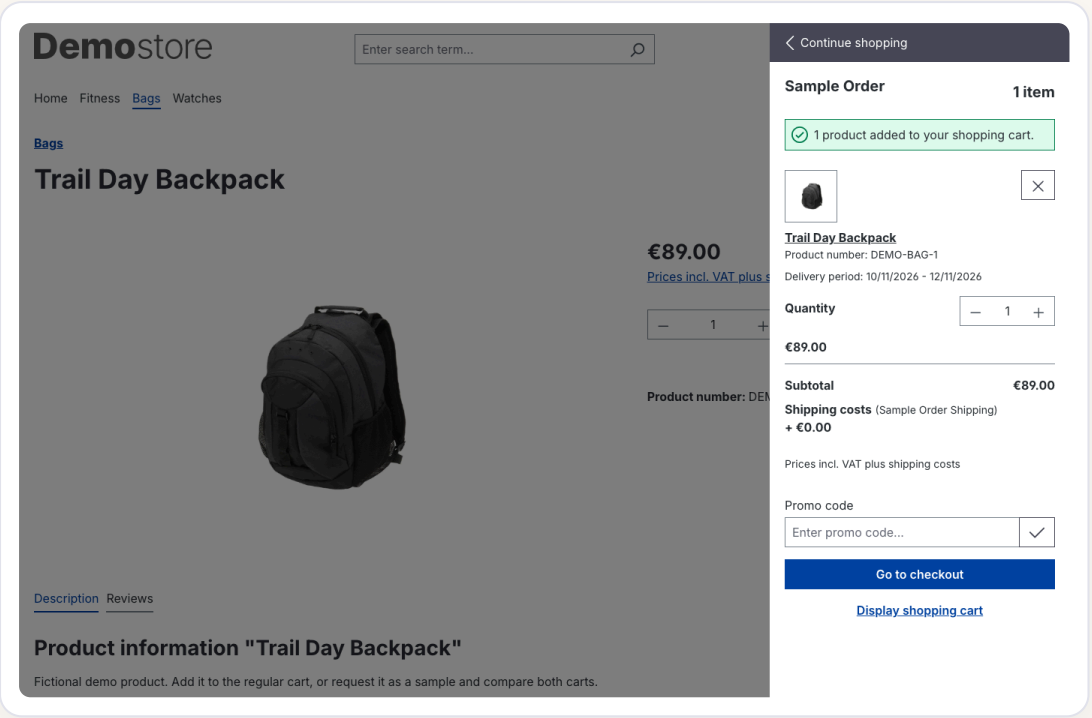

Install, assign, review

1. Upload the ZIP under **Extensions** → **My extensions**, or unpack it into `custom/plugins/` and refresh the plugin list.
2. Install and activate **Sample Order**.
3. Rebuild assets, clear caches and compile the active theme.
4. Add **Sample Order Payment** and **Sample Order Shipping** to each participating sales channel. Keep your standard methods as defaults.
5. Review the sample shipping prices, currencies and delivery time under **Settings** → **Shipping**.

> Sample controls appear only in sales channels where both sample methods are active and assigned.

03 · STOREFRONT

A second cart on the standard checkout

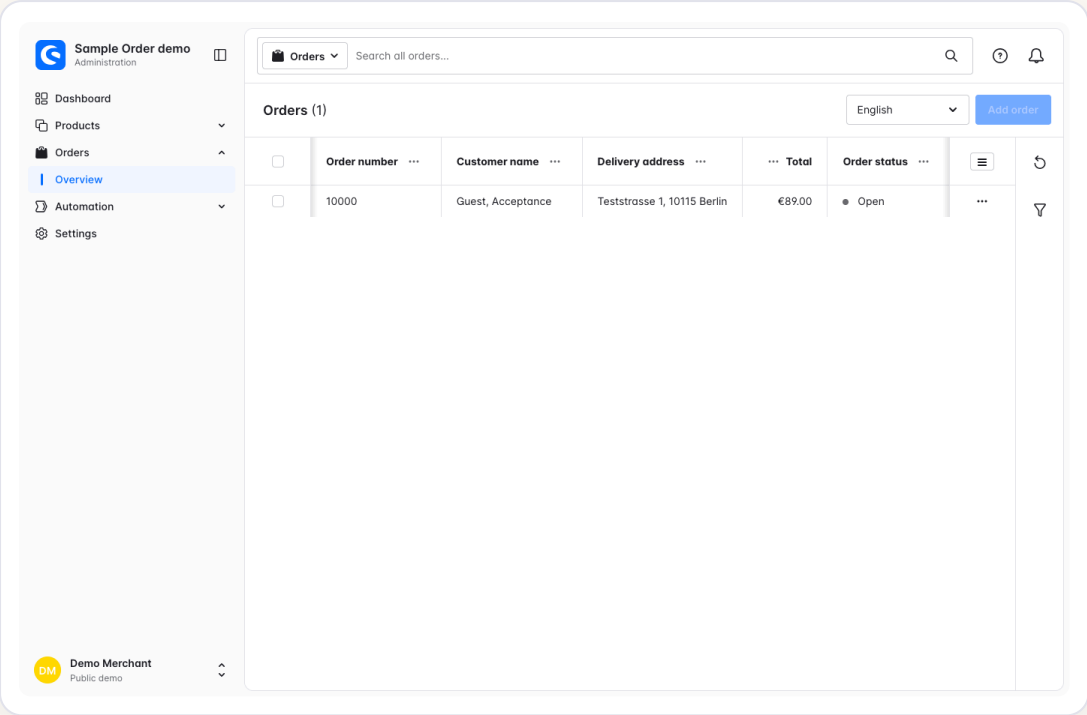

Customers click **Sample Order** on a product page. The item goes to a separate offcanvas cart with its own indicator in the header, and the regular cart is not touched.

Checkout uses the sample payment and shipping methods, for guests and registered customers alike.

04 · GOOD TO KNOW

What to expect

The supplied payment method does not collect money. It leaves the transaction open for manual processing.

Prices, stock checks and quantity rules are those configured in your shop, so samples are not automatically free or discounted.

The button is available for all purchasable products; individual eligibility is not configurable.

> Sample orders keep real totals and an open payment, so they count in sales reports and exports. Identify them by the Sample Order payment and shipping methods.

Uninstalling turns the sample methods off and keeps historical orders.
